EMPLOYMENT

Full Stack Intern	Deltika - Tel Aviv, Israel	January - April 2021
--------------------------	-----------------------------------	-----------------------------

Fiverr Analytics Dashboard

- Developed an AI driven analytics tool for Fiverr freelancers to improve their gig rating, qualify for loans, and receive cash advances for gigs. Worked alongside UI/UX designers for the front-end decisions.
- Implemented User Auth with AWS Cognito, and created Serverless Lambda functions with AWS Lambda.
- Technologies used: React; styled-components; Chart.js; Python; Flask; AWS: Lambda, Cognito, Amplify; BS4;

Front-End Web Developer	Self-Employed	May 2018 - October 2020
--------------------------------	----------------------	--------------------------------

<https://www.ryanroberts.dev/>

- Developed responsive front-end websites for clients using HTML, CSS, SCSS, JavaScript, and later on React.
- Converted designs from Figma, and Dribbble into pixel-accurate CSS code. SCSS modules for React projects.
- Gained 10+ new clients via referrals from satisfied customers.

Floral Clerk	Pavilions - Long Beach, CA	May 2018 - Oct 2020
---------------------	-----------------------------------	----------------------------

- Consulted with customers regarding the type of floral arrangements desired. Took orders, and created custom arrangements, wedding bouquets, funeral arrangements, corsages, and boutonnieres.
- Proven ability to increase sales through upselling techniques as well as implement additional processes that drive profitability.

EDUCATION

Tel Aviv, Israel	Israel Tech Challenge	October 2020 - March 2021
-------------------------	------------------------------	----------------------------------

- 5-Month full-time intensive training bootcamp focused on web development, using the latest languages and frameworks. Learned full-stack web development, with applied fundamental computer science principles.

Long Beach, CA	Long Beach City College	Fall 2017 - May 2020
-----------------------	--------------------------------	-----------------------------

- A.A.S. in Computer Science Engineering with Minor in Mathematics. In-major GPA: 3.5. (95 Israeli Scale)
- Undergraduate Coursework: Operating Systems; Databases; Data Structures and Algorithms; OOP in Java; Comp. Architecture; Discrete Structures; Computational Theory; Calculus; Public Speaking

TECHNICAL EXPERIENCE

Projects

- **HumbleCompass - Vegan Restaurant Finder (In Progress)**. A mobile application allowing users to locate nearby vegan restaurants, via an interactive compass UI. Flutter; Firebase; Google Maps/Yelp API; Material UI
- **SneakerStore - Online Sneaker Resale Marketplace (2020)**. Online e-commerce website where users can buy, sell, and bid on name-brand sneakers, and compare prices to the current stock price. MERN Stack
- **PetCenter - Pet Adoption App (2020)**. Built an application allowing users to browse local pets that are listed for adoption, and contact the owners. MERN Stack; SCSS; JWT Authentication
- **React + Firebase - Microblogging App (2020)**. Created a dynamic twitter-like clone that allows users to create a profile, compose and publish tweets, and make edits to their profile. React; Firebase; SCSS; GoogleAuth

ADDITIONAL EXPERIENCE AND AWARDS

- **Third Place, ITC Medical Innovation Hackathon**: Awarded 3rd place for a project, out of 80 participants. Built a dynamic screener that uses machine learning to detect developmental delays in children.
- **Eagle Scout (2017)**: Led a team of 20+ people to construct 4 garden planters, as well as a drip irrigation system for a children's preschool. The garden is still being used by the preschool children today.

Languages and Technologies

- React; Next.js; JavaScript; TypeScript; Node.js; Express; Python; Flask; SCSS; CSS-in-JS; Git; Bash
- VS Code; JetBrains; MongoDB; MySQL; Firebase; AWS Cognito, Lambda, Amplify; Selenium; BS4
